Methodology. A ticket is included if it is currently In Progress or Needs Analysis and its Client field is FINRA, its title contains “FINRA” or the “FIN -” project prefix, or its parent is a FINRA ticket. Titles, descriptions and comments were all searched. Not counted: CBT-85, CBT-97 and CBT-137 (ETL 2.0 pilot tickets covering FINRA alongside Rogers and Anaplan, 0 h logged); CR-489 (a DEL ticket) and MEG-33053 (a Block ticket), which only mention FINRA in passing. Hours logged is the total time logged on each ticket in Jira, all time, including any child tickets. “Updated” is the ticket's last-updated date in Jira; tickets with no update in over 90 days are flagged.

JQL: `status in ("Needs Analysis","In Progress") AND (cf[10094] = "FINRA" OR text ~ "FINRA" OR summary ~ "FIN" OR parent in (issuesWithText("FINRA")))`, then reviewed by hand.

Generated 14 Oct 2026.
